Airborne Instruments Laboratory - Purchasing System Review

Airborne Instruments Laboratory

Attn:

Vice-President for Administration

Census Road

Dear Park, Long Island, New York

Gentlemen:

My letter dated 13 May 1964 which approved your Purchasing System is amended effective 15 January 1965, by eliminating therefrom the dollar limitations for advance notifications of and consent to, fixed price Subcontracts and Purchase Orders, except that where any contract does not provide for the waiver of the requirement for advance notifications or other requirements upon the approval of your Purchasing or Procurement System, such requirements shall continue. Limitations and requirements which are not based upon price alone, and the requirement for notification of and consent to the procurement or lease of special tooling or capital or test equipment, etc. shall likewise continue. The effect of this amendment is to eliminate the requirement for prior consent to and advance notification of, fixed price Subcontracts or Purchase Orders except as indicated above. Except as hereby modified all the terms, conditions and limitations of my said approval letter remain unchanged.

Very truly yours,

[Redacted Signature]

Contracting Officer
